

# Certified Ethical Hacking With Penetration Testing

## CEHWPT

# Gamo@HP:~\$Whoami

## ❶ SPEAKERS INFO

### ■ MR. KHALED GAMO

Khaled Gamo is managing information Security of Almadar Aljadid, Almadar is first mobile operator in Libya. He was Director General of National Information Security & Safety Authority (NISSA). He holds a Bachelor's degree in communication engineering as well as Holding a series of certification in field IT and information security such as CEH, ECSA, CCIE security written exam, CCVP, CCNP, and CCNA. He has over 18 years of experience in the Telecom Sector and information technology he was working in Huawei Libya as Data communication product manager, also he was technology division manager in Libya post Telecommunication Company. Khaled was managing cyber security programs at national level including national cyber security strategy and building Libya-CERT. He was also involved in developing Cyber security legislation initiative in Libya.

# SANS Cyber Security Roadmap

## Cyber Security Skills Roadmap

Explore this interactive training roadmap to find the right courses for your immediate cyber security skill development and for your long-term career goals. More than 60 courses deliver critical skills in the cyber defense operations, digital forensics, software development, and management practice areas of cyber security.

### 1. BASELINE SKILLS

**Core Techniques**  
Prevent, Defend, Maintain

2 COURSES

#### Every Security Professional Should Know

Security Essentials

[SEC401](#)

Hacker Techniques

[SEC504](#)

**Security Management**  
Managing Technical Security Operations

2 COURSES

### 2. FOCUS JOB ROLES

#### Monitoring & Detection

*Intrusion Detection, Monitoring Over Time*

2 COURSES

#### Penetration Testing

*Vulnerability Analysis, Ethical Hacking*

2 COURSES

#### Incident Response & Threat Hunting

*Host & Network Forensics*

3 COURSES

### 3. CRUCIAL SKILLS, SPECIALIZED ROLES

#### Cyber Defense Operations

*Harden Specific Defenses*

8 COURSES

#### Specialized Penetration Testing

*Focused Techniques & Areas*

7 COURSES

#### Threat Intel & Forensics

*Specialized Investigative Skills*

5 COURSES

#### Development & Secure Coding

4 COURSES

#### Industrial Control Systems

3 COURSES

CISSP® Training

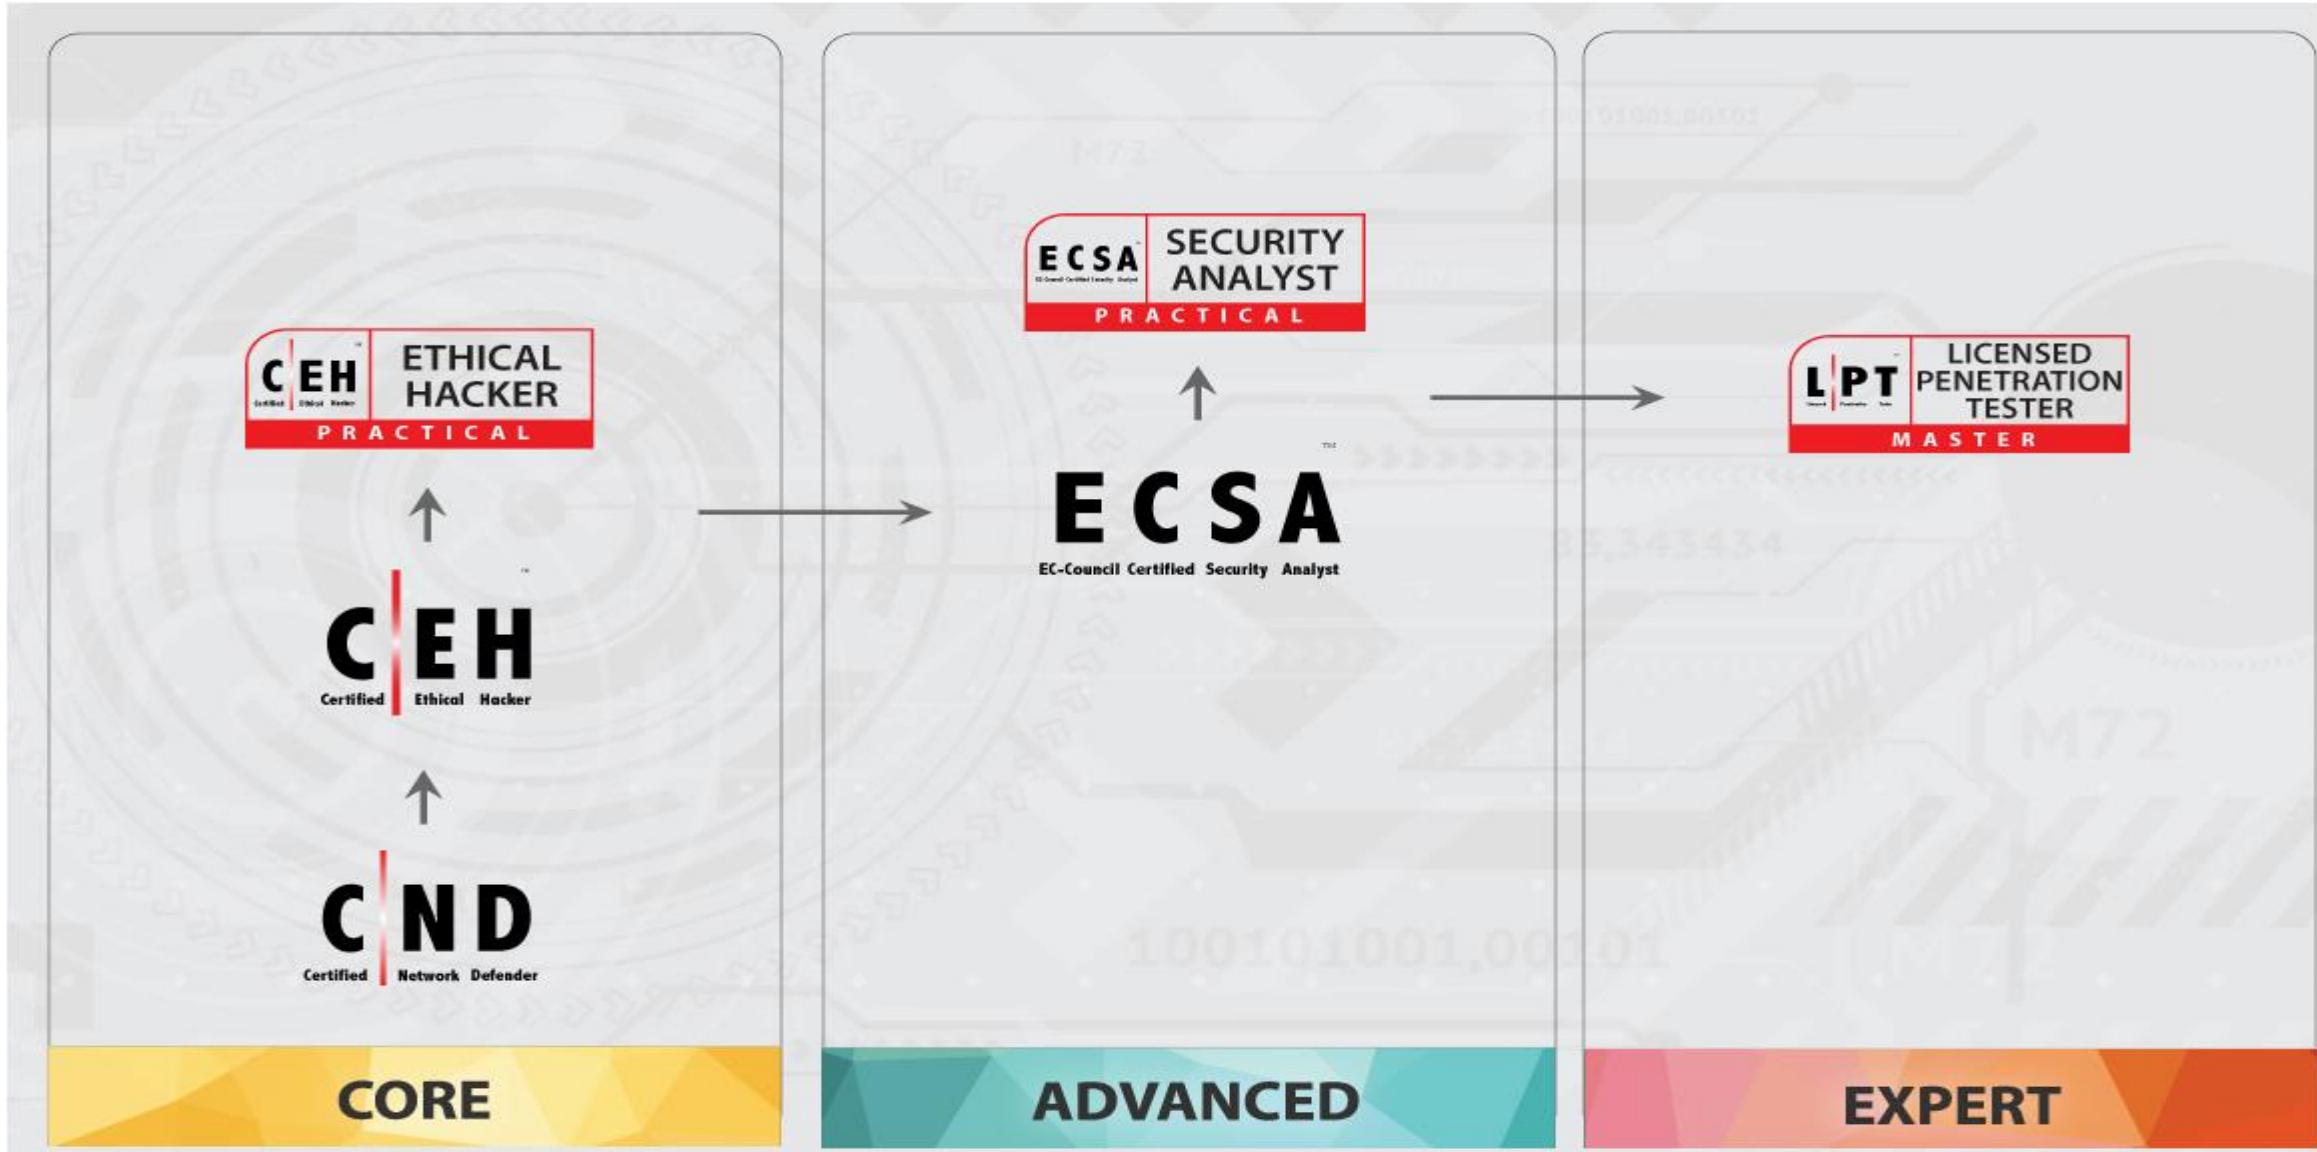

[MGT414](#)

#### Advanced Management

*Advanced Leadership, Audit, Legal*

4 COURSES

# Eccouncil Cyber Security Roadmap

# Offensive of Security Cyber Security Roadmap

## MOST POPULAR

### FOUNDATIONAL COURSE

#### NETWORKS

Offensive Security Certified Professional  
**OSCP**

OFFICIAL CERTIFICATION COURSE  
**Penetration Testing with Kali Linux (PwK)**  
*ONLINE TRAINING*

PwK is a foundational pentesting course that covers the latest tools and techniques while also training students to maintain an offensive mindset.

**ENROLL NOW**

### ADVANCED COURSE

#### WEB APPLICATIONS

Offensive Security Certified Web Expert  
**OSWE**

OFFICIAL CERTIFICATION COURSE  
**Advanced Web Attacks & Exploitation (AWAE)**  
*ONLINE TRAINING*

AWAE is designed to specifically address the unique challenges and vulnerabilities associated with web application security and pentesting.

**ENROLL NOW**

### EXPERT COURSE

Offensive Security Certified Exploitation Expert  
**OSEE**

OFFICIAL CERTIFICATION COURSE  
**Advanced Windows Exploitation (AWE)**  
*LIVE TRAINING*

AWE is an advanced course that requires experienced exploit developers to execute complex exploits within the modern Windows Environment.

**VIEW COURSE**

# “ Who Should Attend This Course “

- Security Officers
- Auditors
- Security Professionals
- Site Administrators
- Any person that might be worried about the integrity of their network infrastructure

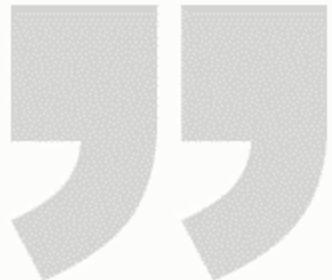

# What's Expected of You

Practice builds knowledge, knowledge  
builds confidence

— SuperDale

# Time to Start “Thinking” like a Hacker

- Hacking vs. Ethical Hacking
- Fundamentals of Information Security
- Terminology
- The Technology Triangle

# Hacking vs. Ethical Hacking

“Ethical Hacking”  
really?

Define hacking

Internet crimes

Intellectual  
property

# Fundamentals of Information Security

Authenticity

Eavesdropping

ARP Poisoning

DoS

Spoofing

# Where Do Most Attacks Come From?

External

Foreign Countries

Internal

# How Many Attack Vectors Are You Aware Of?

- VM & Cloud environments
- Unpatched OS/software
- Social networking
- Internal users
- Hackivism
- Malware
- Botnets
- Security staffing
- Lack of security policies
- Compliance with regulations/laws
- Complexity of network infrastructure
- Mobile devices

# How Many Attack Vectors Are You Aware Of?

- Auto configuration
- Incompatibility of logging systems
- Default activation
- Shortcuts
- Bigger headers
- 4to6 translation
- Multiple IP's per device
- Network discovery

# Hacking Concepts

Hacking is exploiting security controls  
either in a technical, physical or a human-  
based element

— **Kevin Mitnick**

# Who? What? Where?

What is hacking?

What's an Ethical Hacker?

Types of hackers?

Why do they hack?

How does hacking influence companies?

# Hacking Defined:

Exploiting a Systems Vulnerabilities  
and Security Controls to Gain Access  
to System Resources and Features,  
Outside the Creator's Original  
Purpose.

# History of Hacking

In the beginning...

Political Agenda

Defacing or Disabling Websites

Targets

Government Agencies  
Multinational Corps  
“Wrong”

# How Does Hacking Influence Companies?

- Customer private information
- Intellectual property
- Down time / slow site
- Loss of revenues
- Financial information
- Reputation
- Loss of business

# Hacking Phases

# Summary

- Reconnaissance
- Scanning
- Gaining access
- Maintaining access
- Clear tracks

What is the MOST secure  
system?

The one that is never built

# You Can't Stop “Them”

Your job is to discourage, misdirect and slow them down

Time is NOT on your side

Attacker only has to find 1 opening  
You have to cover all of them

# The Phases

Reconnaissance

Scanning

Gaining access

Maintaining  
access

Clearing tracks

# Phase 2) Scanning

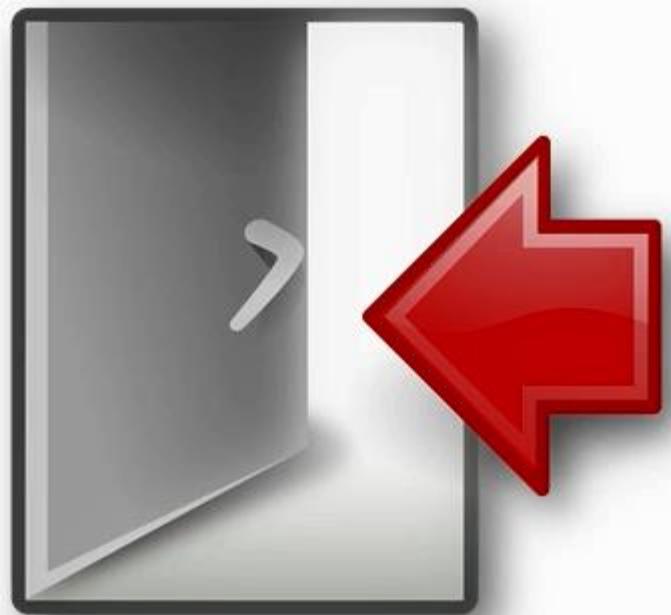

## Gather Info

- ID systems
- Vulnerabilities

## Tools Used

- Port Scanners
- Vulnerability Scanners

# Phase 3) Gaining Access

## Path

- Via network
- Via OS
- Via application
- Our goal?

# Phase 4) Maintaining Access

- ❑ PWNing the system
- ❑ Use system as a launch pad
- ❑ Inject Backdoor/Trojans
  - ❑ Used to revisit
  - ❑ Used to sniff/monitor network
- ❑ Use resources
- ❑ Harden up

# Phase 5) Clearing Tracks

“These are not the drones that you  
were looking for...”

- Destroy proof
- Hide my stuff
- Cyber blind

# Categories of Attacks

- Application attacks
- Misconfiguration attacks
- Shrink-wrap code attacks
- O/S attacks
- Entry Points

# Application Attacks

## Causes

- ❑ Time
- ❑ Features
- ❑ QA
- ❑ Add-on

## Results

- ❑ Buffer overflows
- ❑ Cross-site scripting
- ❑ Active content
- ❑ DoS and SYN
- ❑ SQL Injection

## Other App Attacks

- ❑ Session hijacking
- ❑ Man in the Middle
- ❑ Directory traversal

# Visual of Directory Traversal

The screenshot shows a web browser window titled "Index of /files - Iceweasel". The address bar displays the URL "natas2.natas.labs.overthewire.org/files/". The browser interface includes a menu bar with File, Edit, View, History, Bookmarks, Tools, and Help. Below the menu is a toolbar with various icons. The main content area shows a file listing titled "Index of /files". The table has columns for Name, Last modified, Size, and Description. It lists two files: "pixel.png" (modified 06-Jun-2013 13:57, size 303) and "users.txt" (modified 12-Jul-2013 13:35, size 145). At the bottom of the page, the Apache server information is visible: "Apache/2.2.22 (Ubuntu) Server at natas2.natas.labs.overthewire.org Port 80".

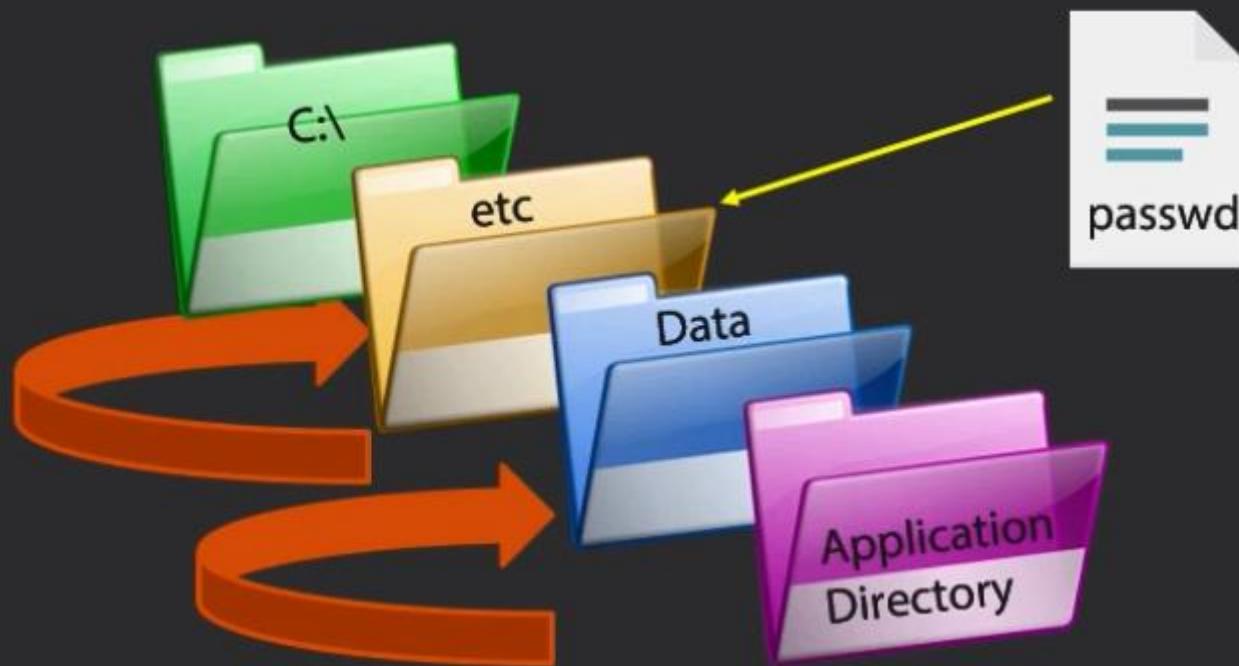

Name	Last modified	Size	Description
<a href="#">Parent Directory</a>	-	-	
 <a href="#">pixel.png</a>	06-Jun-2013 13:57	303	
 <a href="#">users.txt</a>	12-Jul-2013 13:35	145	

Apache/2.2.22 (Ubuntu) Server at natas2.natas.labs.overthewire.org Port 80

# Visual of Directory Traversal

`http://YourApplication.com`

`http://YourApplication.com/. . . / . . . /etc/passwd`

# Misconfiguration Attacks

## Targets

- Web servers
- Application platforms
- Frameworks
- Databases
- Hardware

# O/S Attacks

Gaining access via  
vulnerabilities

O/S vulnerabilities via  
defaults

O/S attacks via non-  
updated systems

# Entry Points for an Attack

Remote Network  
Dial-Up Network

Local Network  
Stolen Equipment

Social Engineering  
Physical Entry

# Necessity of Ethical Hacking

# Rapid Growth in Tech = Trouble

## What Ethical Hackers do for companies

- Review systems and infrastructure
- Test current security
- Create solution
- Retest

You HAVE to answer questions like:

- What can be seen?
- What is being monitored?
- What can be done?
- Is there adequate protection?
- Are compliances met?

# What Skills You Must Have

# “I've Got Hacking Skills”

O/S Knowledge

Computer  
professional

Network guru

Security awareness

# “I’ve Got Hacking Skills”

Software  
knowledge

Management skills

Patience

A lot of “Sherlock  
Holmes”

# Vulnerability Research

# Knowledge IS Power!

- How often are you checking?
- Where do you check?
- Start thinking like a Hacker
- Collect information about trends in security, attacks, and threats
- Find out how to recover
